Awards

1. Poz & Proud has delivered the Positive Award for the first time. The award went to two doctors: Dr. L. van Rozelaar, who works at Laser Center Amsterdam, specialized in facial and wrinkle treatment, and Dr R.B. Karim, plastic surgeon at the OLVG, with special attention for reconstruction surgery. Together they have made the treatment against lipoatrophy (degradation and / or displacement of adipose tissue) possible and made it accessible, despite unclear and meager reimbursement structures at health insurers. Thus the winners have given homosexuals with HIV a new chance to participate in society with this disorder (very emaciated faces). The Award was created to distinguish an individual, group, institution or organization that contributes in a special way or has contributed to improving the quality of life of homosexuals with HIV. (2011)
- 2 the Best Journal Article by an International Author in the Aesthetic Surgery Journal during the 2014 calendar Year: Complications After Facial Injections With Permanent Fillers: Important Limitations and Considerations of MRI Evaluation.
